EDUCATION

VIT Bhopal University

Bachelor of Engineering in Computer Science: CGPA : 8.8

Bhopal, India

July 2022 - May 2026

Jagran Public School (CBSE)

Senior Secondary (12th) – 85.6%

Lucknow, India

March 2021

Jagran Public School (CBSE)

High School (10th) – 94%

Lucknow, India

March 2019

TECHNICAL SKILLS

Libraries & Business Intelligence: Power BI, Pandas, NumPy, Matplotlib, Seaborn, Git, GitHub

Programming Languages: Python, SQL, T-SQL, C++, DAX

Cloud & Data Warehousing: Azure (Data Factory, Data Lake Storage Gen2, Synapse Analytics), Google Cloud Platform (GCP)

Big Data & Processing: Apache Spark (PySpark, Spark SQL), Databricks, Hadoop, Hive, MapReduce, YARN

Orchestration & Streaming: Apache Airflow, Kafka, API Integration

PROJECTS

AdventureWorks | *Azure Data Factory, Databricks, PySpark, Synapse Analytics, ADLS*

April 2026

- Orchestrated automated ETL pipelines utilizing Azure Data Factory to extract multi-table enterprise data, facilitating ad-hoc reporting and accurate market trend analysis.
- Architected a 3-tier Medallion lakehouse deploying Azure Databricks clusters and PySpark to execute scalable data transformations, rigorous data cleansing, and schema validation.
- Provisioned Azure Synapse serverless SQL pools using the OPENROWSET() function to query curated datasets, resolving complex data requests from cross-functional teams.
- Engineered secure Service Principal authentication to seamlessly integrate the finalized data warehouse with Power BI, driving data visualization for actionable insights on enterprise sales records.

OmniLake | *Python, PySpark, Azure Databricks, Synapse SQL, ADLS*

March 2026

- Engineered a metadata-driven ingestion pipeline using Python and JSON configurations to dynamically extract 7 distinct E-commerce datasets, enabling comprehensive competitor data analysis.
- Architected a 3-tier Medallion data lakehouse utilizing Azure Databricks to apply complex data transformations and enforce rigorous schema validation, ensuring high data accuracy.
- Optimized data storage architecture by converting raw CSV feeds into columnar Parquet formats, accelerating downstream read speeds for regular performance reports.
- Provisioned Azure Synapse serverless SQL pools to generate virtualized tables, enabling a highly available consumption endpoint for continuous process tracking and business intelligence.

Supply Chain Control Tower | *Python, Power BI, DAX, Excel/CSV*

January 2026

- Spearheaded the development of an end-to-end Power BI dashboard to analyze inventory levels and supplier performance, identifying process gaps that resulted in a 15% improvement in forecast accuracy.
- Analyzed over 30 complex DAX measures and utilized Power Query to clean, transform, and model data from 5+ disparate sources, extracting hidden trends and actionable insights.
- Designed and presented executive-level reports that translated complex supply chain data into clear visual insights for stakeholders, leading to a 12% optimization in logistics efficiency.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

TCS CODEVITA | *Global Coding Competition*

February 2026

- Secured a global rank of 2018 out of 100,000+ international participants in TCS Codevita, executing complex algorithmic solutions against top-tier developers.

VICE PRESIDENT | *NULL Chapter*

July 2024

- Directed a cross-functional team of 50 members to orchestrate the SECVIT'24 CTF, successfully engaging 700+ active participants across 15+ technical workshops.

Sports Coordinator and Cricket Team Captain | *VIT Bhopal*

June 2023

- Organized 10+ events during Advitya, the college's flagship annual fest, successfully engaging an audience of 7,000+ students and managing logistics.
