EDUCATION

VIT Bhopal University

Bachelor of Engineering in Computer Science: CGPA : 8.8

Bhopal, India

July 2022 - May 2026

Jagran Public School (CBSE)

Senior Secondary (12th) – 85.6%

Lucknow, India

March 2021

Jagran Public School (CBSE)

High School (10th) – 94%

Lucknow, India

March 2019

TECHNICAL SKILLS

Programming Languages: Python, SQL, T-SQL, C++, DAX

Cloud & Data Warehousing: Azure (Data Factory, Data Lake Storage Gen2, Synapse Analytics), Snowflake, Google Cloud Platform (GCP)

Big Data & Processing: PySpark, Apache Spark, Spark SQL, Databricks, Hadoop, Hive, MapReduce, Yarn

Orchestration & Streaming: Apache Airflow, Kafka, API Integration

Libraries & Business Intelligence: Power BI, Tableau, Pandas, NumPy, Matplotlib, Seaborn, Git, GitHub

PROJECTS

AdventureWorks | Azure Data Factory, Databricks, PySpark, Synapse Analytics, ADLS

April 2026

- Orchestrated automated ETL ingestion pipelines utilizing Azure Data Factory to extract multi-table enterprise data (Adventure Works) and load it securely into the Azure Data Lake Storage Gen2 Bronze layer.
- Architected a 3-tier Medallion lakehouse (Bronze, Silver, Gold) deploying Azure Databricks clusters and PySpark to execute scalable data transformations, rigorous data cleansing, and schema validation.
- Provisioned Azure Synapse serverless SQL pools using the OPENROWSET() function and External Tables to query curated Gold-tier datasets, delivering a centralized serving environment for enterprise analytics.
- Engineered secure Service Principal authentication to seamlessly integrate the finalized data warehouse with Power BI, enabling the visualization of tens of thousands of enterprise sales records.

OmniLake | Python, PySpark, Azure Databricks, Synapse SQL, ADLS

March 2026

- Engineered a metadata-driven ingestion pipeline using Python and JSON configurations to dynamically extract 7 distinct E-commerce datasets into a MongoDB staging area and Azure Data Lake Storage.
- Architected a 3-tier Medallion data lakehouse utilizing Azure Databricks to systematically orchestrate ELT workflows, apply complex data transformations, and enforce rigorous schema validation.
- Optimized big data storage architecture by converting raw CSV feeds into columnar Parquet formats with SnappyCodec compression, significantly reducing storage footprint and accelerating downstream read speeds.
- Provisioned Azure Synapse serverless SQL pools utilizing OPENROWSET and Parser Version 2.0 to generate virtualized tables from the Gold layer, enabling a highly available consumption endpoint for Business Intelligence.

Supply Chain Control Tower | Python, Power BI, DAX, Excel/CSV

January 2026

- Spearheaded the development of an end-to-end Power BI dashboard to analyze inventory levels, demand forecasts, and supplier performance, resulting in a 15% improvement in forecast accuracy and a 10% reduction in stockout incidents.
- Analyzed over 30 complex DAX measures and utilized Power Query to clean, transform, and model data from 5+ disparate sources (including Excel/CSV), creating actionable insights into key performance indicators (KPIs).
- Designed and presented executive-level reports that translated complex supply chain data into clear visual insights, providing data-driven recommendations that led to a 12% optimization in logistics and warehousing efficiency.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

TCS CODEVITA | Global Coding Competition

February 2026

- Secured a global rank of 2018 out of 100,000+ international participants in TCS Codevita, executing complex algorithmic solutions against top-tier developers.

VICE PRESIDENT | NULL Chapter

July 2024

- Directed a cross-functional team of 50 members to orchestrate the SECVIT'24 CTF, successfully engaging 700+ active participants across 15+ technical workshops.

Sports Coordinator and Cricket Team Captain | VIT Bhopal

June 2023

- Organized 10+ events during Advitya, the college's flagship annual fest, successfully engaging an audience of 7,000+ students and managing logistics.
